Dayton, OH 45459-4051

Dear Jeff,

I would like to take a moment to express my gratitude for the effort of several of your employees during the recent relocation of the RF MML from building 254 to building 79. The move that occurred during the first week of April was the culmination of more than a year of preparation and due to the hard work, attention to detail, and positive attitude of your employees we experienced no major issues during the relocation.

I would especially like to express my appreciation to Mr. Charlie McNeely for his dedication and hard work before and during the move. Over the past year, Charlie has been meticulous about logging all equipment into the equipment inventory to ensure that all equipment was able to be tracked prior to the move. Charlie organized for disposal and/or turn-in trash, unused or obsolete equipment and materials that have cluttered the RFMML for years ensuring that items were not needlessly moved from one building to the other only to be turned in or thrown away after. During the week of the move Charlie helped move some equipment to the new building using his own vehicle. He made sure that when equipment arrived at the new building it was placed in the proper location and led the setup of the lab in building 79.

It is not an exaggeration that without Charlie's dedication and hard work that the RF MML relocation from building 254 to 79 would not have happened as smoothly as it did.

Sincerely,

A handwritten signature in blue ink that reads "Garrett J. Stenholm".

Garrett J. Stenholm  
RF MML Government Manager
